

# Are you ready for automated collection?

## Cart delivery will take place this spring!

Each household will receive one 96-gallon green cart with a green lid for trash collection and a 64-gallon blue cart with a blue lid for recycling. Delivery of carts will take place within the first few months of 2024.

Automated collection offers our community safe, clean and efficient curbside trash and recycling collection. Carts are on wheels, which make moving them easy, and the attached lids help keep pests out of containers and reduce fly-away litter. This service also decreases the risk of driver injury and greater productivity.

Waste Management and Castle Shannon Borough look forward to offering residents this new type of service.

- All trash must be bagged and placed inside of your provided cart.
- Recyclables must be placed loose in to your cart, and cardboard boxes must be broken down.
- No materials will be accepted outside of the carts. Additional carts are available for an annual fee of \$110 in 2024, with an increase each year.
- Bulk collection will be the fourth week of the month on your scheduled collection day. Bulk collection calendars are available in the welcome letter from WM.

You can also find your trash and recycling service day and collection information at [\*\*wm.com\*\*](http://wm.com).

- Visit [wm.com](http://wm.com) and click “View Schedule” at the top of the homepage. You will be taken to a page to search by your service address.
- You can view your trash and recycling schedule by clicking the green “select service” button.
